

Certification Workshop

Seven Dynamic Assessment Tests to Gauge Young Children's Learning Potential and Use for Cognitive Intervention

Instructor: Professor David Tzuriel

About Instructor

Professor David Tzuriel is a clinical and educational psychologist who has much expertise and experience on dynamic assessment of learning potential. He is currently a Full Professor at Bar Ilan University. He was the Chairman of the School of Education at Bar Ilan University (2003-2007). He also served as Editor-in Chief of the Journal of Cognitive Education and Psychology (2006-2011). Now he heads the Research Unit, the Feuerstein Institute (June 2014 – Present). Professor Tzuriel has published extensively in peer reviewed journals with over 110 articles on cognitive modifiability; presented at international conferences over 170 times and run over 190 workshops on Dynamic Assessment internationally for over 30 years.

Heep Hong society has the great honour to invite Prof. Emeritus, David Tzuriel, School of Education, Bar Ilan University to Hong Kong to conduct two 2-day workshops for local practitioners in the field of preschool rehabilitation and early childhood education.

Learning objectives of the 2-day workshop:

- The ways in applying dynamic assessment and mediated learning in preschool children
- The theoretical foundations of the dynamic assessment and mediated learning approach
- Different deficient cognitive functions
- How to use the seven dynamic assessment tests/cognitive intervention programmes for preschool children, including
 - The Children's Analogical Thinking Modifiability Test (CATM)
 - The Children's Inferential Thinking Modifiability Test (CITM)
 - The Children's Seriation Thinking Modifiability Test (CSTM) - Revised
 - The Windows Mental Rotation-Dynamic Assessment (WMR-DA)
 - The Children's Conceptual and Perceptual Analogical Modifiability (CCPAM) Test
 - The Cognitive Modifiability Battery (CMB): Assessment and Intervention
 - The Seria-Think Instrument - Revised

Workshop Activities:

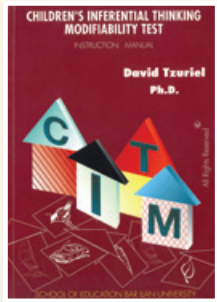

- Lecture and presentation
- Demonstration with pre-school children
- Discussion

Date	: Class A: 30/4 - 1/5/2019 (Tuesday - Wednesday) (PROF-HO-19-00001) Class B: 2/5 - 3/5/2019 (Thursday - Friday) (PROF-HO-19-00002)
Time	: 9:30am - 5:30pm (The learning content for both classes are identical)
Target	: Psychologists, therapists, social workers and teachers
Venue	: Head Office, Heep Hong Society (Unit K, 10/F, MG Tower, 133 Hoi Bun Road, Kwun Tong)
Fee	: \$4,800 (not including assessment kit)
Medium	: English
Prerequisite	: Applicants must have attended the 1-day Preschool Education Professional Seminar on 29 April 2019
Certification	: Attendees will receive certificate upon full completion of the 1-day seminar on 29 April 2019 and either one of the 2-day workshops
Application	: The application form is available on the course
Webpage	: aped.heephong.org
Remarks	: Course fee does not include the tests, for purchase order please contact Professor David Tzuriel directly

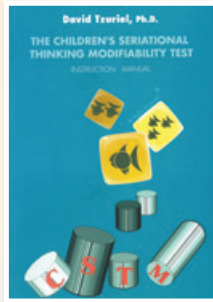

For details:

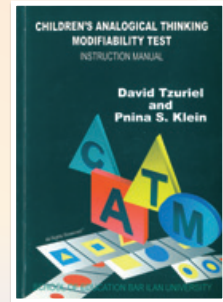

Professor Tzuriel developed seven dynamic assessment tools and devised intervention programmes based on them. The tests not only served as an assessment of learning potential, but also as a cognitive intervention targeting deficient cognitive functions in children aged 4-7years-old.

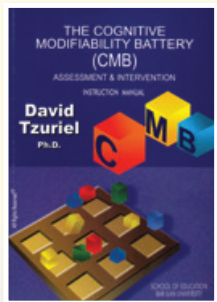

The Children's Inferential Thinking Modifiability Test (CITM)

The Children's Seriation Thinking Modifiability Test (CSTM) - Revised

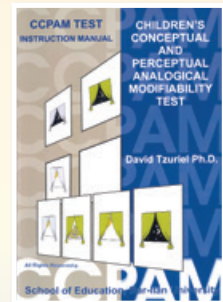

The Children's Analogical Thinking Modifiability Test (CATM)

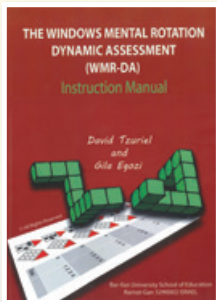

The Cognitive Modifiability Battery (CMB): Assessment and Intervention

The Seria-Think Instrument - Revised

The Children's Conceptual and Perceptual Analogical Modifiability (CCPAM) Test – Closed and Construction Analogies

The Windows Mental Rotation-Dynamic Assessment (WMR-DA)

Remark: The above test kits **are not included** in the course fee of the workshop.
